

HIGH PRODUCTIVITY COMPACT MACHINING CENTER  
EQUIPPED WITH DUAL PALLET

# VC

**3600/30**

**DN SOLUTIONS**

# VC 3600/30

The VC 3600/30 is a compact high-productivity compact machining center designed for the automotive and IT industries. It is equipped with a simultaneous operation function where rotary table turns and the all axes are positioned simultaneously when tools are changed. Durability and reliability have been further improved by adopting a more rigid frame and a servo unit.

Dual pallet was applied to improve productivity, and a thermal displacement compensation program was applied as standard for precise and fast processing of various parts. In addition, it provides various convenient functions such as EZ work.

**SERVO-TYPE APC AND ATCAS STANDARD FEATURES TO ACHIEVE EVEN HIGHER PRODUCTIVITY AND RELIABILITY**

- Servo-driven APC reduces pallet change time by about 30%.
- Servo-driven ATC incorporating 14 tools as standard feature reduces tool change time by up to 11%.

**NEWLY-DESIGNED DIRECT COUPLED SPINDLE WITH IMPROVED RIGIDITY AND PRODUCTIVITY**

- The spindle design has been optimized by reducing acceleration and deceleration times by up to 30% to achieve even higher productivity.
- Adoption of dual contact spindle as standard feature improves heavy duty machining performance.

**SMALL FOOTPRINT, VARIOUS USER CONVENIENCE FEATURES**

- 1620mm (63.8 inch) machine width minimizes footprint.
- Auxiliary chip box (optional) effectively filters fine aluminum chips.

# BASIC STRUCTURE

The VC 3600/30, a tool taper ISO #30 class dual pallet compact machining is equipped with a highly reliable servo unit and a new frame, and offers superior productivity and reliability.

## High-rigidity structure

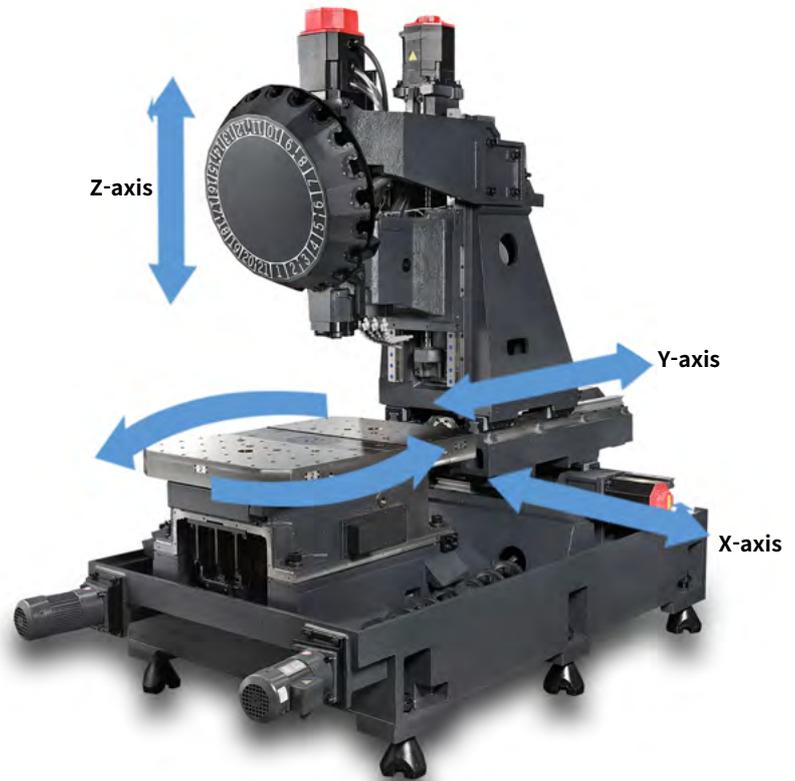

The machine's structure has been improved and optimized by CAE analysis to enhance rigidity and thereby ensure stable and accurate machining over long periods.

## Travel distance

X-axis **520** mm  
20.5 inch

Y-axis **360** mm  
14.2 inch

Z-axis **350** mm  
13.8 inch

## AXIS SYSTEM

Environmentally friendly grease lubrication is adopted as standard for all of the axis feed system, and roller-type LM guides are provided to enhance the rigidity.

## Rapid traverse rate

X-axis **48** m/min  
1889.8 ipm

Y-axis **48** m/min  
1889.8 ipm

Z-axis **56** m/min  
2204.7 ipm

## Roller-type LM guides are provided as a standard feature

A roller-type LM guide is applied to increase the precision of the linear feed system, which is advantageous for high-speed and high-precision machining.

## Grease lubrication for all axes is a standard feature

### Grease lubrication system

The standard grease lubrication system eliminates the need for an oil skimmer and reduces lubrication costs by about 60% compared to oil lubrication.

## Yearly maintenance cost

Max. **60** % ↓

# APC (AUTOMATIC PALLET CHANGER)

The servo driven system has been adopted to further reduce non cutting time (pallet change time), thereby enhancing productivity and reliability.

## Variable control of work piece load

Issuing an M-code corresponding to the work weight can change pallets at a speed appropriate for the weight.

### Table size

**2-650 x 375** mm  
2-25.6 x 14.8 inch

### Max. load capacity

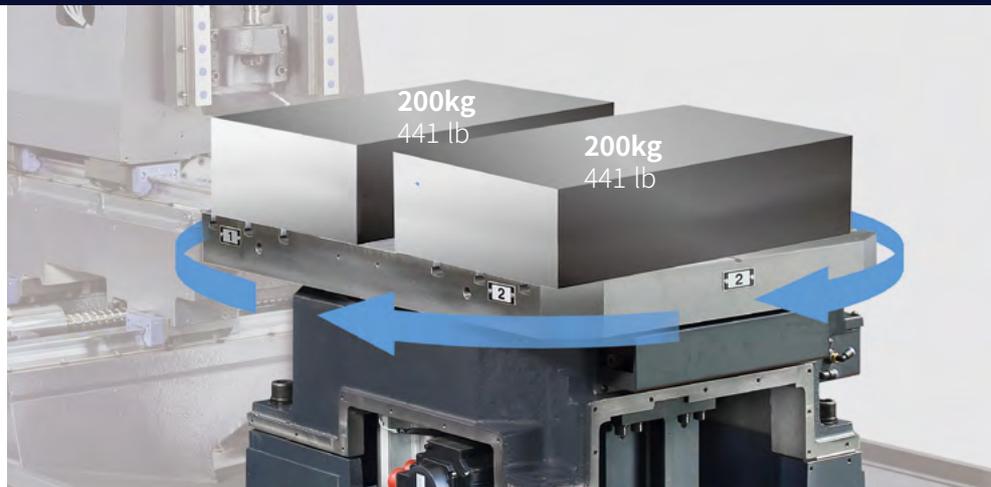

**2-200** kg  
2-441 lb

### Pallet change time

**3** SEC (120 kg on 1 pallet)

### Max. work piece height

**300** mm  
11.8 inch

**M 384** : 0~120 kg (biased load)

**M 380** : 120~200 kg (biased load)

## SPINDLE

The newly designed direct-coupled spindle offers enhanced productivity and precision with reduced acceleration / deceleration times and lower vibration / noise.

### Max. spindle speed

**12000** r/min

**18000** r/min OPTION

# MAGAZINE

Machine reliability has been optimized with the new servo tool magazine, while productivity has been enhanced by reducing the tool change time.

## Tool storage capacity

14 ea  
21/24 ea OPTION

## Tool to Tool

1.6 sec.

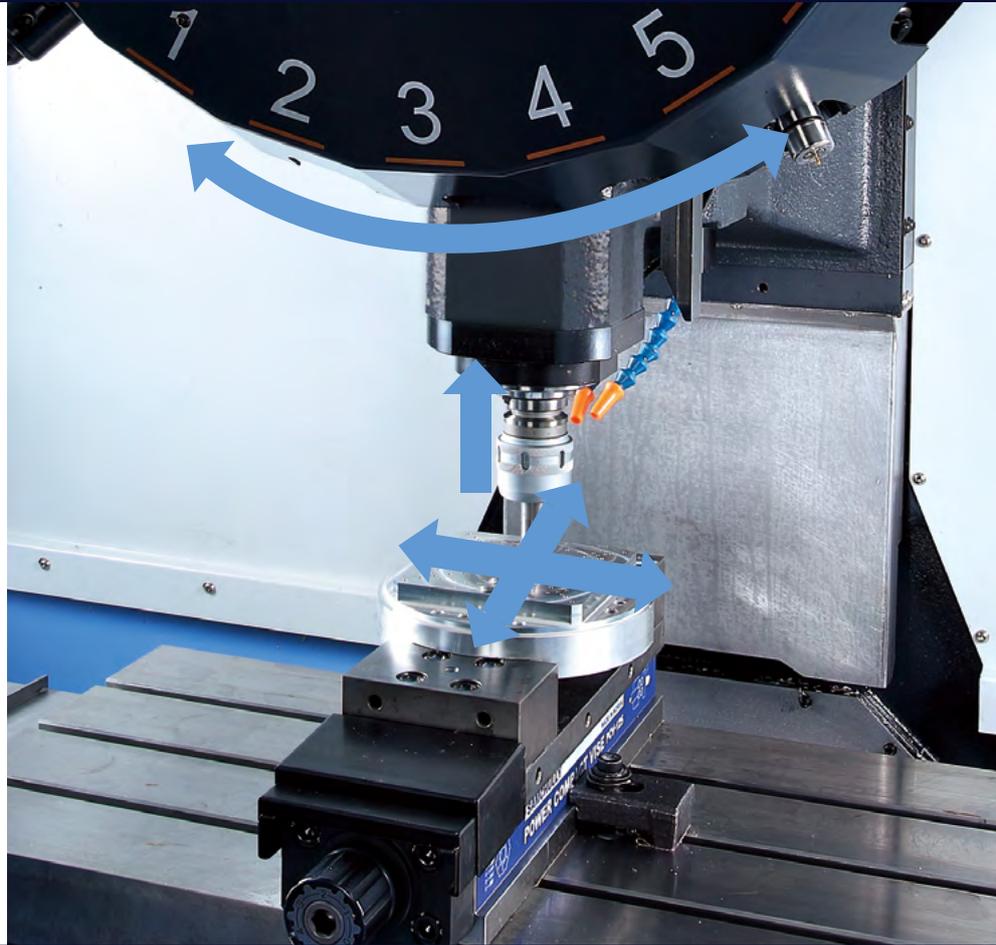

## Chip to Chip

2.6 sec.

\* The Chip-to-Chip time was tested in accordance with DN Solutions's strict testing conditions, but may vary depending on the user's operating conditions.

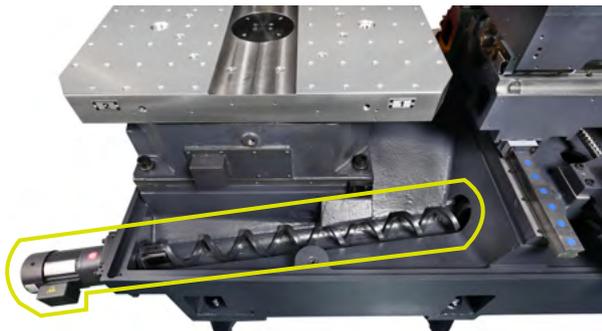

## Simultaneous operation

The Simultaneous Operation Control performs pallet change, and axes home position return and tool change simultaneously to minimize non cutting time.

# FEATURES

What's by applying a double chip screw in the machine, the chip disposal ability was improved. And by placing the control panel on the side, operation is easy and safe.

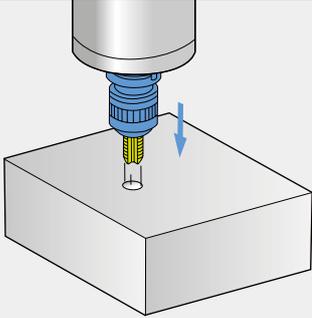

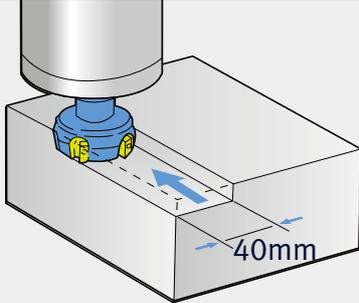

# CUTTING PERFORMANCE

The high power and torque characteristics of the spindle motor provides superior milling and compact machining performance in steel at low rpm, while providing effective high speed machining for aluminum workpieces.

## Machining capacity

DN Solutions FANUC i (at 12000 r/min)

Tap		
		
Tap Carbon steel (SM45C)		
Tap size (mm)	Spindle speed (r/min)	Feedrate (mm/min (ipm))

\* Please contact DN Solutions to select detailed steady rest specifications

● Standard ● Optional X Not applicable

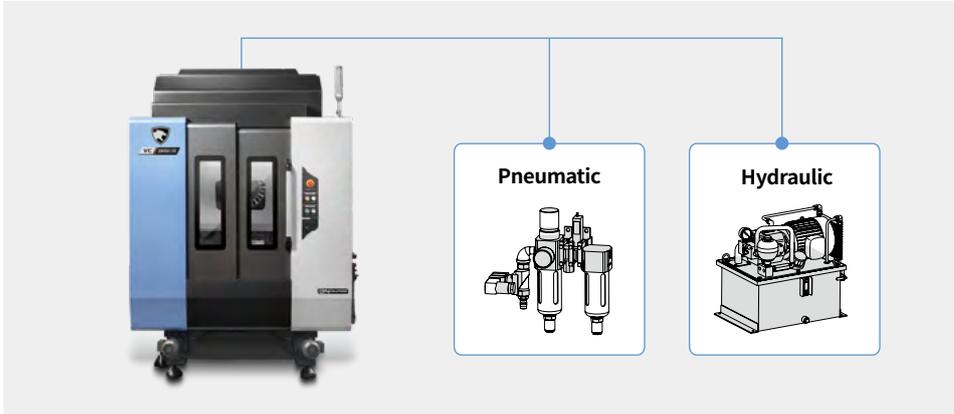

There is a high risk of fire when using non-water-soluble cutting fluids, processing flammable materials, neglecting the controlled and careful use of coolants and modifying the machine without the consent of the manufacturer. Always check the SAFETY GUIDELINES carefully before using the machine.

# PERIPHERAL EQUIPMENT

## Hydraulic/Pneumatic fixtureline OPTION

Users who intend preparing equipment for hydraulic / pneumatic fixtures should consult DN Solutions to determine correct specification.

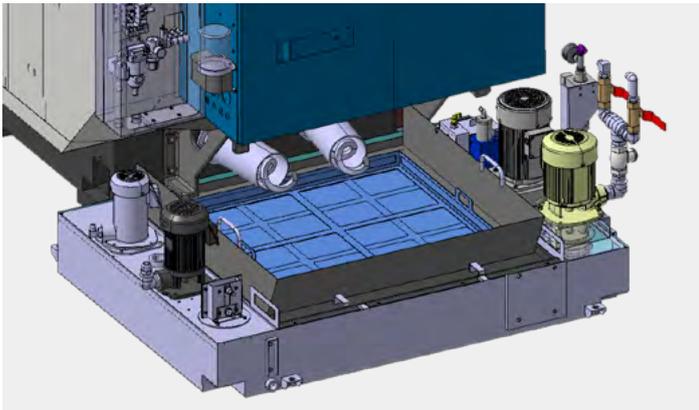

## TSC OPTION

The through-spindle coolant (TSC) system delivers higher machining efficiency (optional).

## An auxiliary chip box

An auxiliary chip box for effective filtering of fine aluminum chips is available as an optional feature

## Top cover

The top cover (standard feature) prevents coolant splash, thereby maintaining a clean working environment.

## Chip conveyor OPTION

### Hinged belt type\*

Most common type of chip conveyor. Appropriate for steel materials generating chips over 30mm.

### Drum filter type\*\*

Chip conveyor with a magnet. Appropriate for machining cast iron and the generation of fine chips.

Chip conveyor type	Material	Carbon steel			Cast iron		Aluminium		
		Long	Short	Needle	Short	Sludge	Long	Short	Needle
Hinged belt type		○	△	X	△	X	○	△	X
Scraper type	General type	X	○	△	○	△	X	△	X

Drum filter type	Hinged type	○	△	X	△	X	○	△	X
	Scraper type	X	○	△	○	△	X	○	△

○: Suitable, △: Possible, X: Not suitable

## Automatic tool Length measurement device OPTION

The Automatic Tool Length Measurement Device monitors excessive tool wear or breakage, and can be used for automatic tool setting.

# DN SOLUTIONS FANUC i PLUS

DN Solutions Fanuc i Plus maximizes customer productivity and convenience.

## 10.4" Screen + New OP

DN Solutions Fanuc i Plus' operation panel enhances operating convenience by incorporating common-design buttons and layout. It features a Qwerty keyboard for fast and easy data input and operation.

### DN Solutions Fanuc i Plus

- 10.4 inch color display
- Intuitive and user-friendly design

### USB and PCMCIA card QWERTY keyboard

- EZ-Guide i standard
- Ergonomic operator panel
- 2MB Memory
- Hot keys

### PCMCIA Card

The PCMCIA card enables uploading and downloading of the NC program, NC parameters, tool information, ladder programs, and also supports DNC operation.

### USB Port

The USB memory stick enables uploading and downloading of the NC program, NC parameters, tool information and ladder programs. (DNC operation is not supported.)
