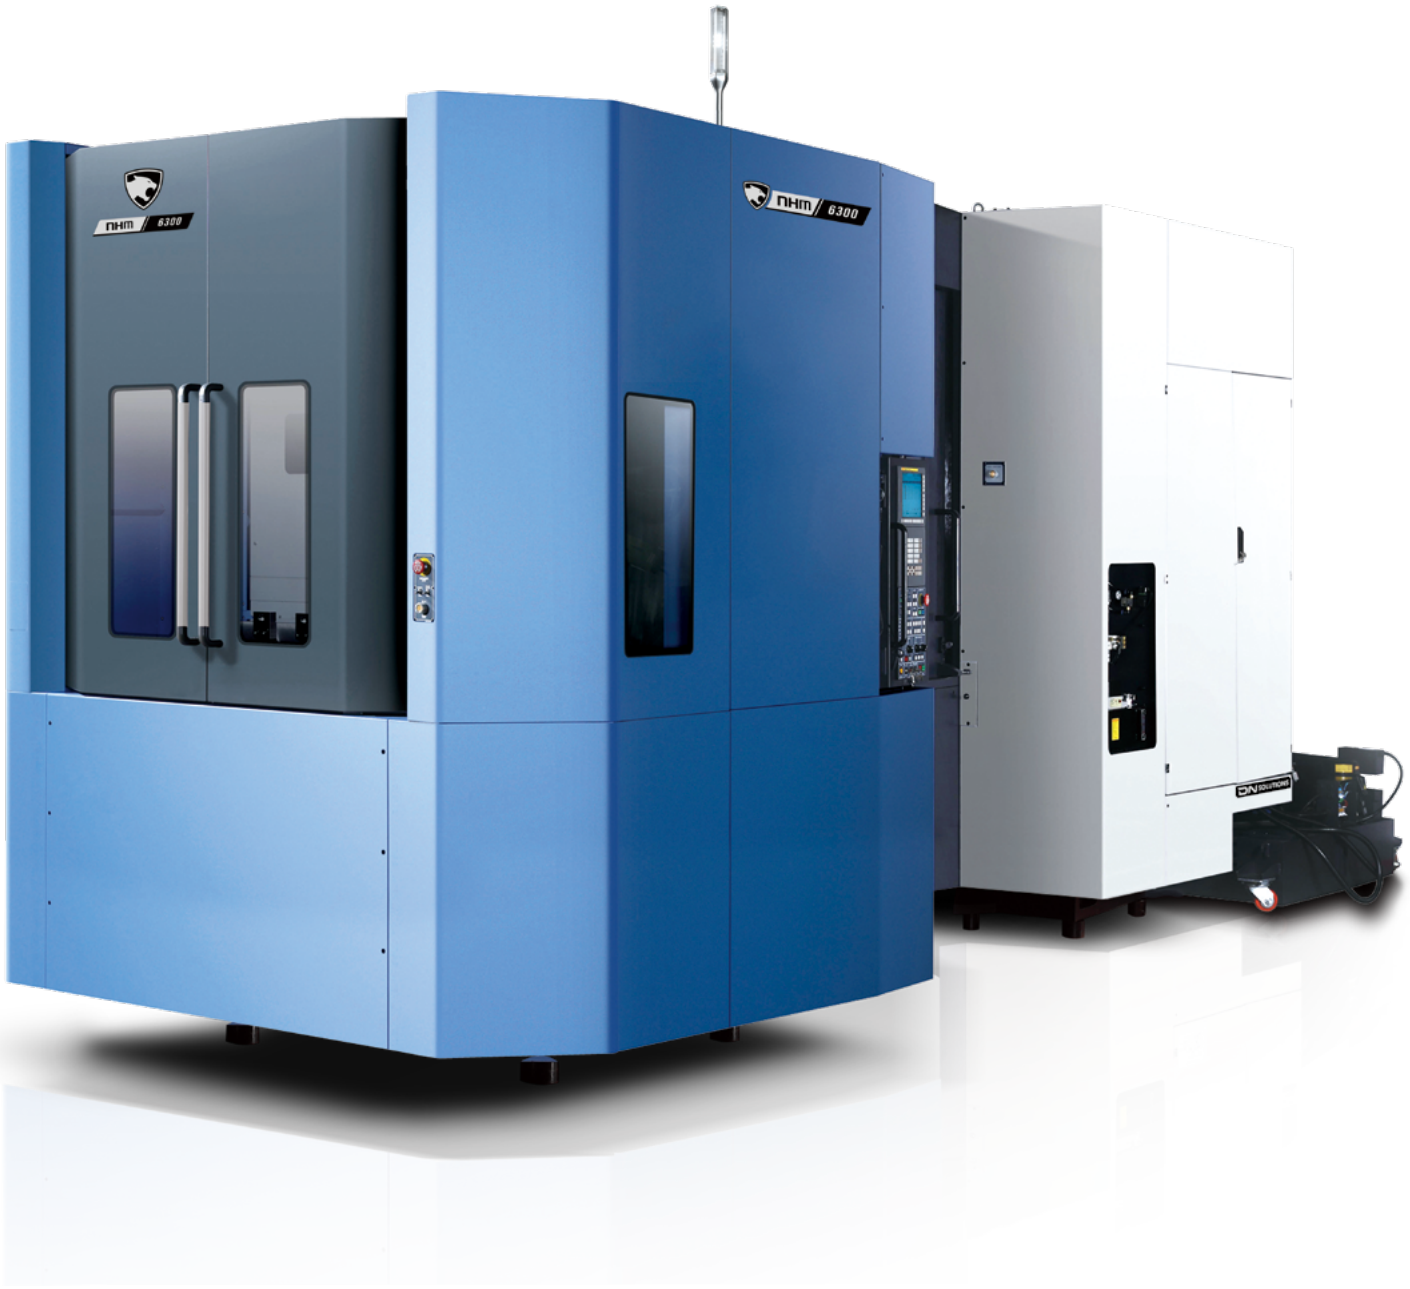
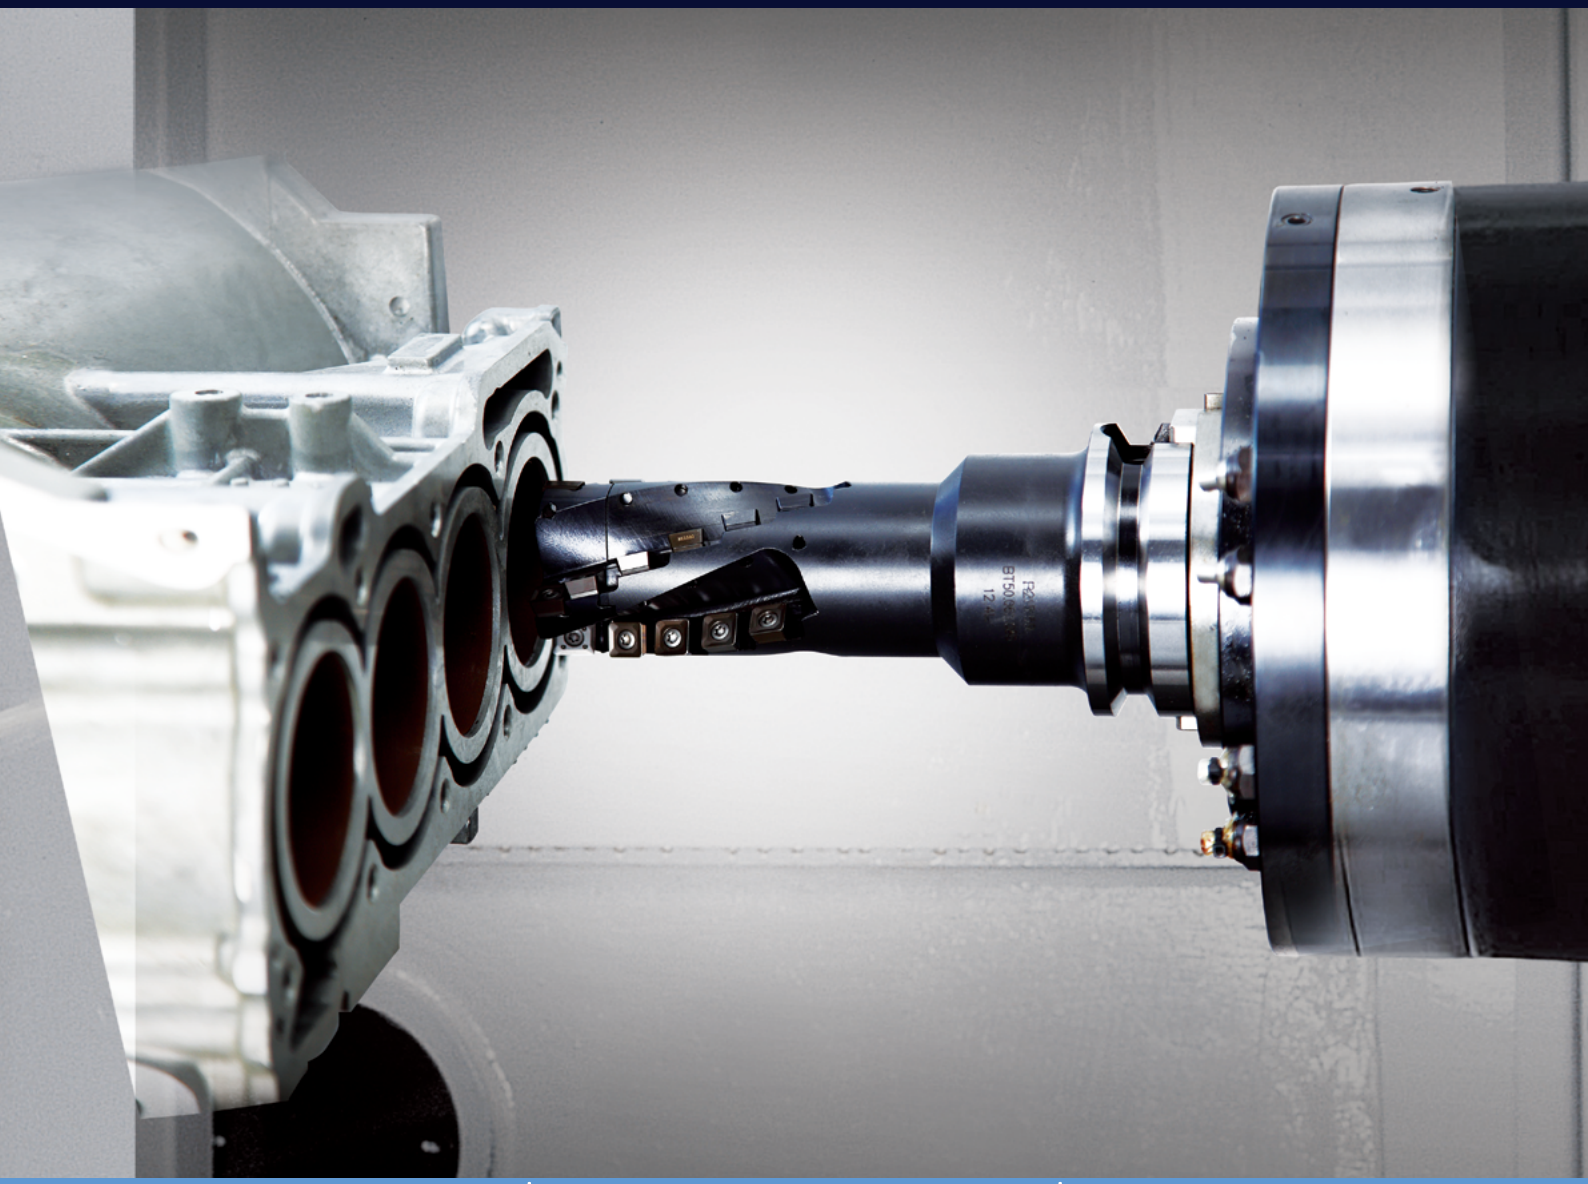
DN SOLUTIONS

NHM 5000 · 6300 · 8000

NHM Series provides the largest machining specifications and production capabilities in its class including powerful cutting capabilities for satisfying diversified needs for production of customers. The integrated structure of the box-type guideway is the optimal structure of excellent production capabilities for machining various materials from common parts to metal hard of cutting with its high rigidity capacity required for powerful cutting process. In addition, replacement speed of tools and palettes at servo motor driving for keeping non-cutting time minimal improves reliability and productivity.





HIGH RIGIDITY ONE-PIECE BED

- The high rigidity one-piece bed supports heavy duty cutting with the adoption of Finite Element Method (FEM) analysis.

HIGH PRODUCTIVITY AND RELIABILITY

- The servo-driven automatic tool changer (ATC) and automatic pallet changer improve parts durability and maintainability, leading to improved product quality. Compatibility with the pallet extension system and minimized idle time ensure even higher productivity.

USER-FRIENDLY FUNCTIONS

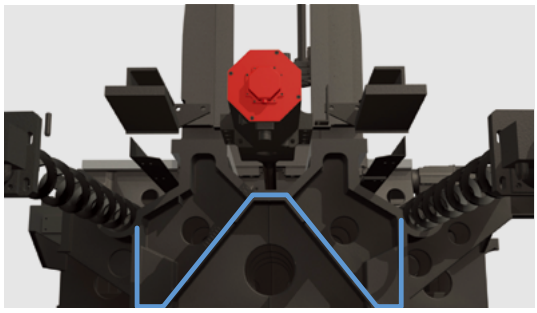
- Various new user-friendly functions have been introduced to reduce the operator's work load

BASIC STRUCTURE | TRAVEL AXIS

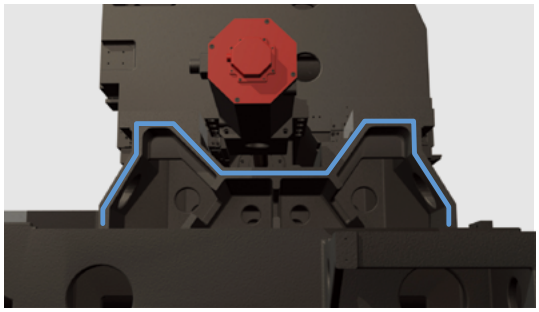
The machine of one-piece structure of the bed and the column yields high productivity.

High rigidity bed structure

NHM Series is designed for keeping high stability and durability intact through FEM technologies; the series ensures continuous powerful cutting power with the structure applied with M- and W-type ribs.



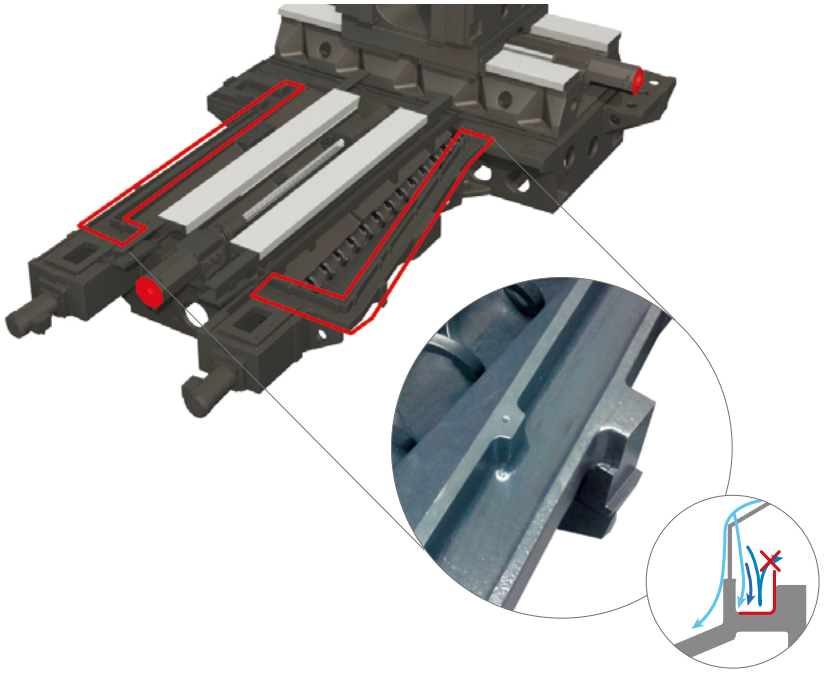
W-type rib



M-type rib

Double-wall configuration

The main body of the system is designed in double wall structure for preventing leak of cutting oil: This design allows easy maintenance and improves productivity as well.

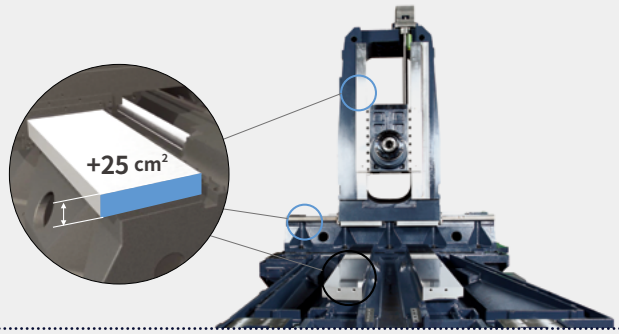


Strong feed axis structure

The extended box-type guideways are applied to all of the axes for providing higher rigidity, and the optimal dynamic rigidity of the main sliding parts further improve capabilities of strong cutting.

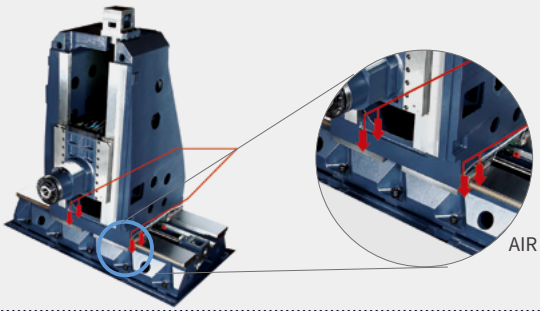
Area of guideway

28% ↑



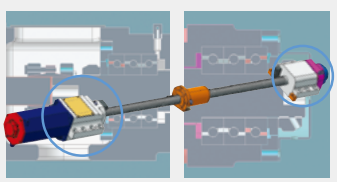
Half-floating air structure of feed system

The half-floating air structure mitigates friction resistance during feed along the X axis resulted form the mass of the spindle and the column for improving accuracy of positioning and repeatability.

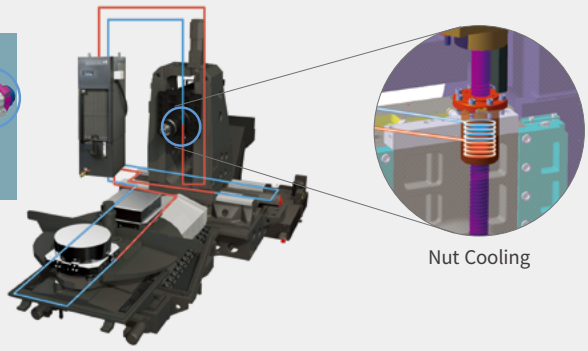


Powerful ball screw and thermal displacement control

The 3-row bearing applied with the rigid coupling keeps precision and rigidity for individual axes high, and high accuracy is implemented by controlling thermal displacement by the ball screw locking devices and the nut cooling system on the all of the axes.



Ball Screw



Nut Cooling

SPINDLE

The high power gear-driven spindle of NHM Series yields excellent rigidity for diverse materials.

Powerful spindle

Designed to minimize vibration and thermal error while offering rapid acceleration and deceleration, the spindle guarantees excellent cutting performance from steel to nonferrous metal parts

Max. spindle speed

NHM 5000 / **NHM** 6300 / **NHM** 8000

6000 r/min

Max. spindle motor power

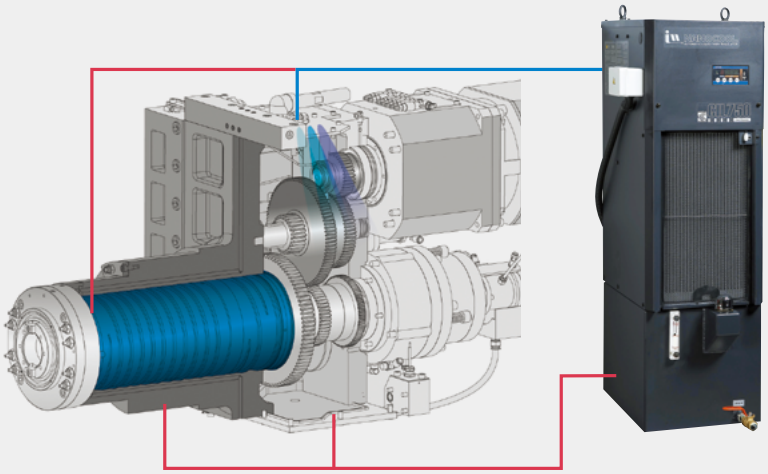
1034 N·m 25.8 ft-lb

NHM 6300 / **NHM** 8000

1732 N·m 1277.5 ft-lb

Spindle cooling system

The spindle temperature is kept uniform by the cooling system. The temperature sensor controls temperature of the jacket surrounding the spindle as well as the temperature of oil circulating about the spindle bearing, the gear and the motor flange for ensuring stable and precise machining.



Dual contact tool system

Tool rigidity is enhanced by the firm clamping of the spindle. Tool lifecycle and cut-surface roughness have been improved as a result of the reduced vibration realized by the dual contact spindle.

Tool type

ISO #50

AUTOMATIC PALLET CHANGER (APC)

The servo-driven APC boasts high reliability with its stable, accurate performance and reduced rejection ratio.

Improved pallet and APC system

The servo-driven APC system realizes increased productivity with fast and accurate pallet change. In addition to its excellent reliability, the improved APC has more space for the operator's convenience.

Pallet change time

NHM 5000
8.5 s

NHM 6300

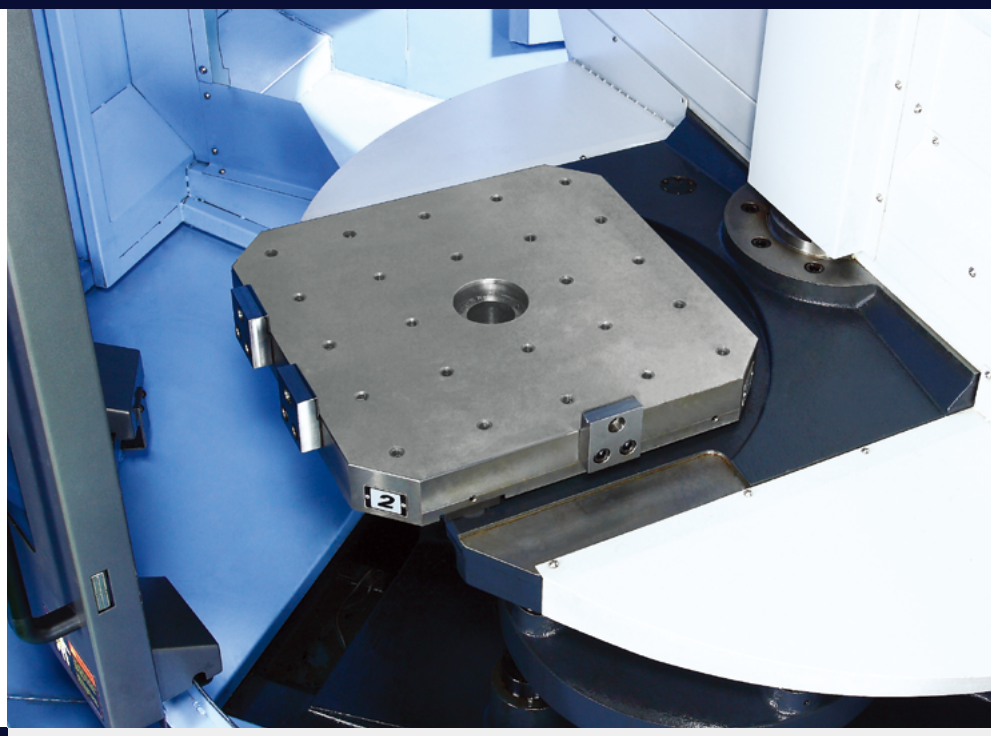
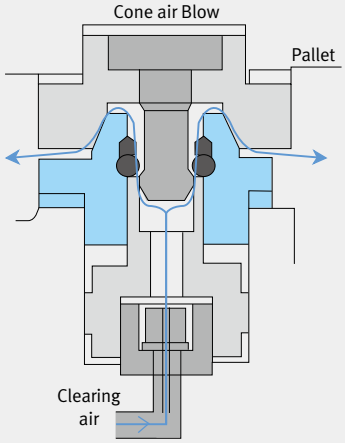
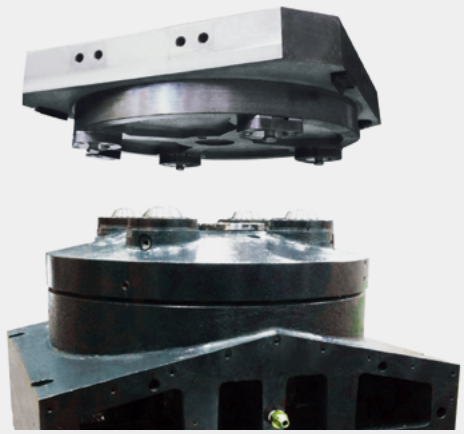
NHM 8000
16 s

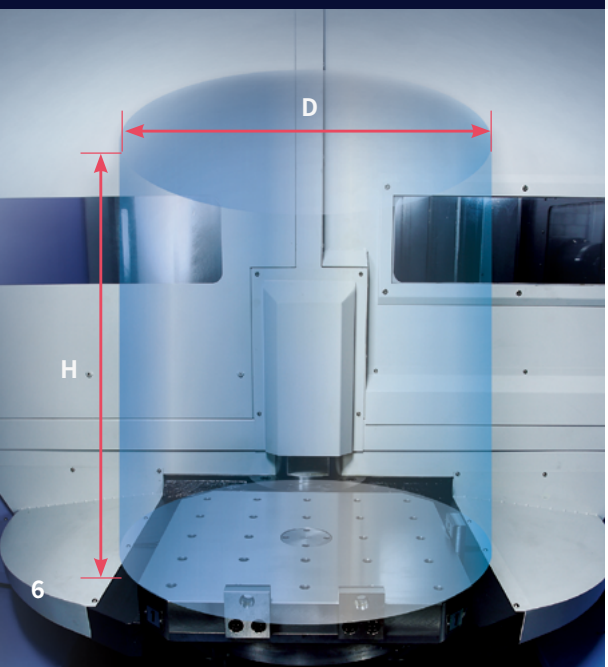


Cone air blower

As a mechanism designed for precise pallet position repeatability, the cone air blower injects high-pressure air into the table fixing pin connecting the table and the pallet in order to remove chips from the pin and guaranteeing them seating at the correct positioning of the workpiece.







Max. Workpiece Size

The NHM Series provides more space for heavier and larger workpieces.

Max. workpiece size (D X H)		
NHM 5000	mm (inch)	Ø 850 x 1100 (33.5 x 43.3)
NHM 6300	mm (inch)	Ø 1050 x 1350 (41.3 x 53.1)
NHM 8000	mm (inch)	Ø 1450 x 1550 (57.1 x 61.0)
Max. workpiece weight (W)		
NHM 5000	kg (lb)	800 (1763.7)
NHM 6300	kg (lb)	1200 (2645.5)
NHM 8000	kg (lb)	2000 (4409.2)

CUTTING PERFORMANCE

The NHM Series realizes excellent machining performance thanks to its improved structure and comprehensive tooling system.

High cutting power

High-rigidity machining can be carried out with precision accuracy and diverse functions.

Convenient short tool cutting

The distance between the spindle and the center of the pallet has been reduced for heavier-duty cutting with shorter tools.

Features

- Increased tool rigidity with a larger diameter
- Innovative improvement of ATC repeatability
- Minimal Z axis displacement at high speed
- Increased tool service life

Tool magazine for diverse types of tools, including chain and matrix tool types

The NHM Series provides 60 tools as a standard feature, and up to 376 tools as an option.

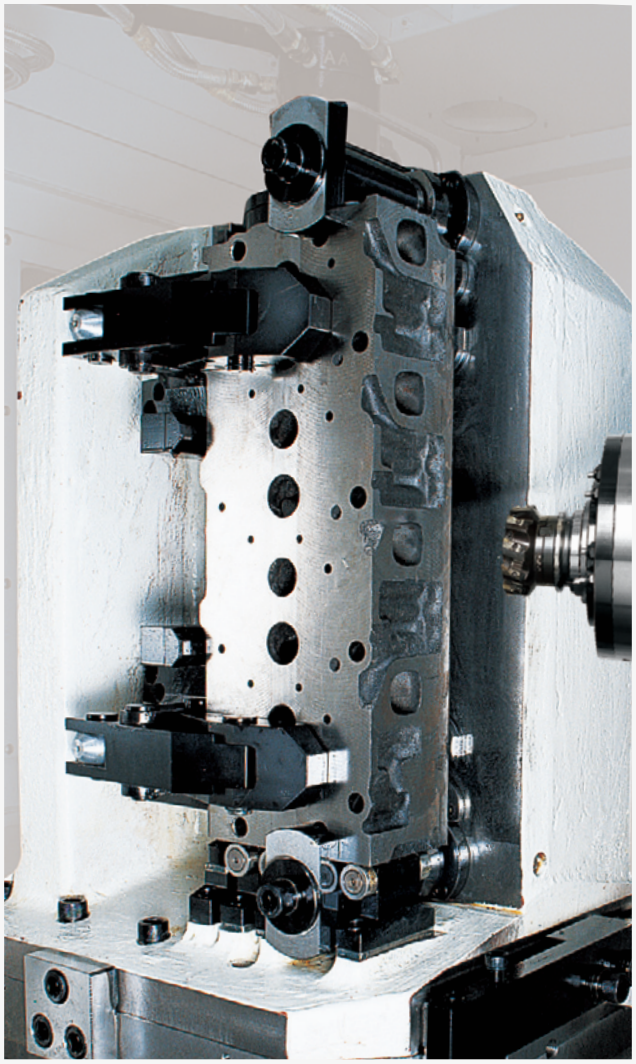
APPLICATION

We offer a wide range of solutions that can be optimized to suit our customer's needs.

Clamping fixtures

The following hydraulic and pneumatic fixture options are available for workpiece set up.

A variety of preparations for workpiece clamping fixtures (hydraulic/pneumatic) option



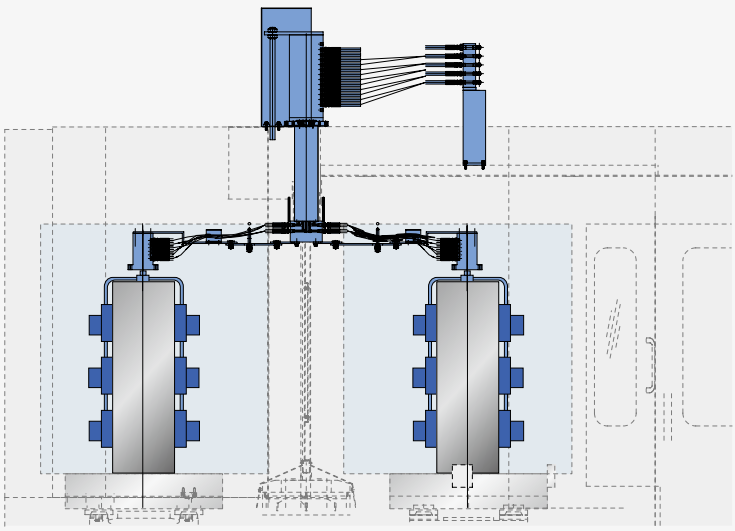
Hydraulic/pneumatic fixture pot

•A/B Line : 2, 4, 6, 8 Pairs
(Including solenoid valve)
•P/T Line : 2, 4, 6, 8 Pairs
(Excluding solenoid valve)

Clamping fixture hydraulic motor

•2.2 kW(3.0 HP) / 7MPa
•3.7 kW(5.0 HP) / 15MPa
•5.5 kW(7.4 HP) / 21MPa
•3.7 kW / 15MPa
•5.5 kW / 21MPa

※ Please provide us with detailed specifications on the order sheet.



MULTI-PALLET SYSTEMS

DN Solutions's linear pallet system (LPS) and multipallet system (RPS) provides users with maximized productivity, rapid installation and commissioning, and easy maintainability.

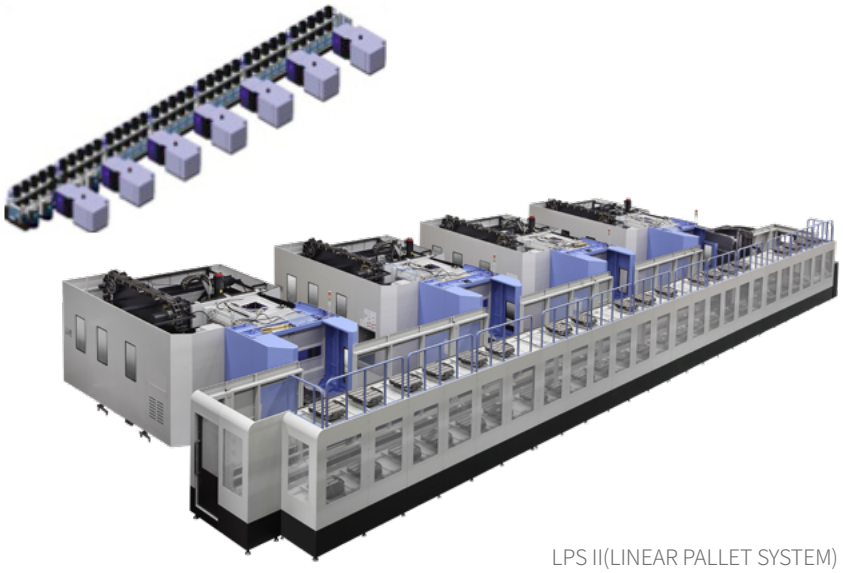
Linear pallet system [LPS II]

option

Designed to provide users with an optimised system, the LPSII linear pallet systems designed and constructed by DN Solutions, offering outstanding flexibility, including system extension and layout change.

Features

- Easy for system extension
- Sufficient workpiece space for high level of work efficiency
- Stable and efficient system operation
- Faster installation and commissioning
- Applicable to all HMC Series machines
- Excellent maintainability



LPS II(LINEAR PALLET SYSTEM)

LPS II Model	LPS 500 II	LPS 630 II	LPS 800 II

No. of setup stations	1 ~ 4		
No. of pallets	12 ~ 70	10 ~ 70	8 ~ 70
Dimensions (L x W)	7824 x 2400 mm (308.0 X 94.5 inch)	7904 x 785 mm (311.2 X 30.9 inch)	8952 x 3500 mm (352.4 X 137.8 inch)

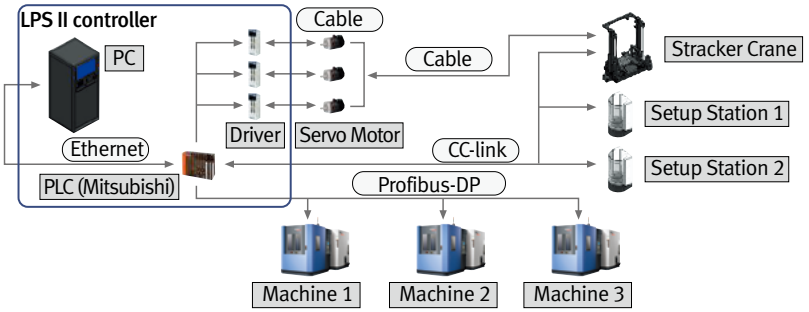
LPS standard control software

- Easily-storable basic information for flexible production.
- Platform management software for rapid production and changes in quantity.
- LPS management solution for fast and flexible production and sudden changes in quantity.

Production management system [DPMS]

The DPMS is an operating system designed to ensure effective control and management of the LPS. The main window provides a solution that enables a flexible and rapid response to changes in output.

System outline



MULTI-PALLET SYSTEMS

Round pallet system [RPS]

option

Compared with standard machines that use 2-pallet type APCs, the RPS can automatically handle 7 to 9 pallets for an extended period. This function enables small quantity batch production using machining scheduling.

ROUND PALLET SYSTEM

The DPMS is an operating system for effective control and management of the RPS. The functions of the DPMS include scheduled operation, data input, and setting change.

FANUC 31i/32i PLUS

Fanuc 31i/32i Plus maximizes customer productivity and convenience.

15" Touch screen + New OP

DN Solutions Fanuc 31iB/B5 Plus' operation panel enhances operating convenience by incorporating common-design buttons and layout. It features a Qwerty keyboard for fast and easy data input and operation.

Fanuc 31i/32i Plus

- 15-inch color display
- Intuitive and user-friendly design

USB and PCMCIA card QWERTY keyboard

- EZ-Guide i standard
- Ergonimic operator panel
- 4MB Memory
- Hot keys
- Enhance AICC BLOCK
- Touch pen provided as standard

iHMI touchscreen

iHMI provides an intuitive interface that uses a touchscreen for quick and easy operation.

Range of applications

Providing various applications related to planning, machining, improvement and utility, for customer convenience.

EZ WORK

The software developed by DN Solutions features numerous functions designed for convenience and ease of operation.

EZ work

The EZ work package delivers speed and efficiency. This menu-driven innovation not only helps customers reduce setup times, but also simplifies common tasks and procedures, reducing the potential for errors. EZ work reduces operating time, protects machinery, enhances quality and speeds up maintenance interventions.

Tool support functions

Tool management I

- Tool magazine control
- Tool state display
- Fastems Tool Add/Remove Function option

Tool management II option

- Tool magazine control
- Tool life management
- Tool life prediction • Tool state control
- Balluff Tool ID function

Tool load monitor option

- Detection of tool damage
- Detection of abnormalities during operation
- Detection of no-load air cutting

Productivity improvement functions

Adaptive Feed Control

Function to control feedrate so that the cutting can be carried out at a constant load

APC Setting Screen

A simple automation function that supports automatic processing of the next pallet by setting the processing program for each pallet of the equipment including APC in advance

Pallet magazine support functions

PMC Soft Panel Switch

Manual operations that occur continuously in each stages for APC,ATC change command

Operation support, Help desk functions

Operation rate

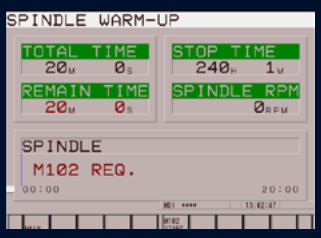
- Measure various machine operating rate
- Support 3 shift operation
- calculate and save 30 days operating rate
- Show data for a specific period

Pattern Cycle

A function to automatically create frequently used part programs.

Renishaw GUI

Renishaw tool length measuring and compensate function



Spindle Warm Up

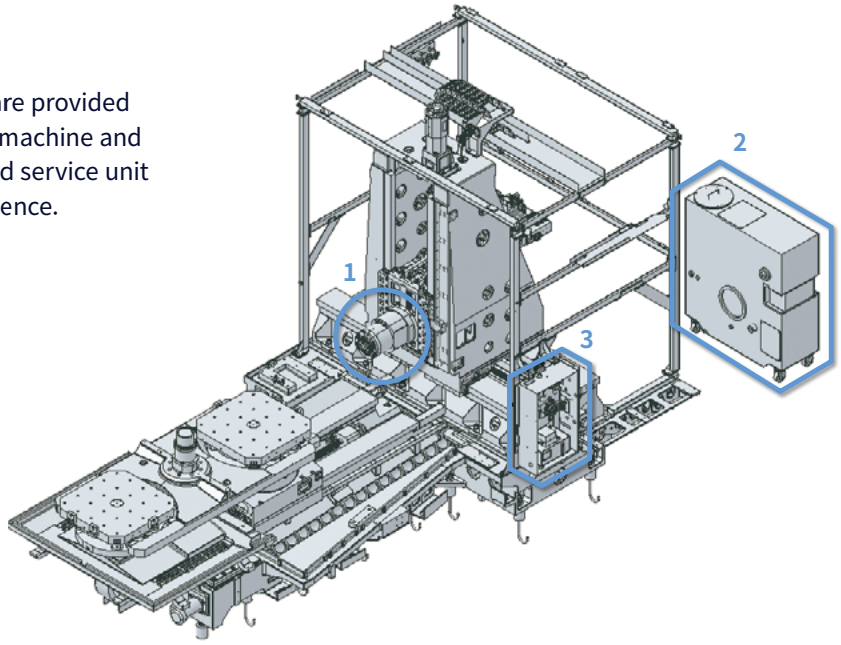
A function that assists spindle warm-up for spindle life when the spindle has not been used for a certain period of time

CONVENIENT OPERATION

Ergonomic design guarantees users' convenience and safety.

User-oriented design

Internal footings and an anti-door-lock function are provided to prevent the operator from being locked in the machine and to guarantee the operator's safety. The centralized service unit and screen panel enhance the operator's convenience.



1.
Flushing system to remove chips from the spindle top and slide cover.

2.
Coolant through spindle function for enhanced productivity option

3.
Centralized utility service unit

The utilities service unit is centralized for convenient maintainability.

ATC screen panel provides easy tool data entry at the tool magazine area

Safety has been improved with machine internal footings

Anti-door lock device

User Convenience

Swiveling Operating Panel

The operating panel can swivel by 90°, and displays various alarm messages concerning machine and controller error, enhancing the operator's convenience.

Portable MPG

The portable MPG allows the user to set up workpieces more easily.

PCMCIA Card

The PCMCIA card enables uploading and downloading of the NC program, NC parameters, tool information, and ladder programs, and also supports DNC operation.

USB Port

Upload/download of NC software programs, NC parameters, tool information and ladder program using a USB drive is allowed, but DNC operation is not supported.

RESPONDING TO CUSTOMERS
ANYTIME, ANYWHERE

DN Solutions Global Network

DN Solutions provides systems-based professional support services, before and after the machine tool sale, by responding quickly and efficiently to customers. By supplying spare parts, product training, field service and technical support, we provide the expert care, attention and assistance our customers expect from a market leader.

Global sales and service support network		51	Technical centers Technical center, Sales support, Service support, Parts support
4	Corporations	200	Service posts
156	Dealer networks	3	Factories

CUSTOMER SUPPORT AND SERVICES

We're there for you whenever you need us.

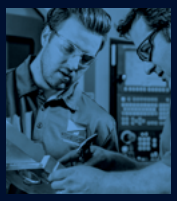
We help our customers operate at maximum efficiency by providing them with a range of tried, tested and trusted services - from pre-sales consultancy to post-sales support.

Field services

- On-site service
- Machine installation and testing
- Scheduled preventive maintenance
- Machine repair service

Parts supply

- Supplying a wide range of original DN Solutions spare parts
- Parts repair service



Training

- Programming, machine setup and operation
- Electrical and mechanical maintenance
- Applications engineering

Technical support

- Supports machining methods and technology
- Responds to technical queries
- Provides technical consultancy
